Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

DETAILED ACTION

This Office Action is in response to amendments and remarks filed December 8, 2006. Claims 1, 3-7 and 10-16 are currently pending.

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 12 and 15 are rejected under 35 U.S.C. 102(b) as being anticipated by Oliver et al. (U.S. Patent 6,455,840).

Regarding claims 12 and 15, Oliver et al. disclose (see Fig. 1) an optical pointing system, comprising: an image sensor (array of photodetectors (not shown), within 2) for detecting light reflected from a worktable surface to generate an image signal; a sampling rate and maximum search window variable circuit (14) for inputting the image signal to detect a quantity of light (avg. illumination 8) and to generate a sampling rate control signal (15) for changing a sampling rate; and a sensor circuit (7 and a part of 2) having a movement value calculation circuit for responding to the sampling rate control signal and calculating the movement value of the image signal. The movement value is inherently stored since processing is carried out.

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

Art Unit: 2878

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claim 14 is rejected under 35 U.S.C. 103(a) as being unpatentable over Oliver et al.

Regarding claim 14, Oliver et al. disclose the claimed invention as set forth above. Oliver et al. do not specifically disclose an A/D converter as claimed. However, A/D converters are notoriously well known. It would have been obvious to one of ordinary skill in the art at the time the invention was made to provide an A/D converter in the apparatus of Oliver et al. to obtain digital signals for faster processing or to obtain signals more resilient to noise, thereby improving detection.

Allowable Subject Matter

5. Claims 1, 3-7, 10, 11 and 16 are allowed over the prior art of record.
6. Claim 13 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Response to Arguments

7. Applicant's arguments with respect to the claims have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

8. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37

Art Unit: 2878

CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
